Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 February 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 12-17 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.

DETAILED ACTION

The amendment filed 2/6/07 and the remarks presented therewith have been carefully considered. However, they are not deemed to be fully persuasive.

Claim Rejections - 35 USC § 112

1. Claims 15 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no clear antecedent basis for "said sections" as recited in claim 15.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 12-17, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson (4,413,034) in view of Kaufman (5,192,106).

Anderson discloses a method of manually manipulating a data storage disc using a device having opposing flat padded surfaces to engage the data storage surfaces on either side of the disc. Anderson's patent describes the use of its device in handling

Art Unit: 3652

phonograph record disc rather than "optical" data storage discs or compact discs as called for in the claims of the instant application.

However, it is old and well known to remove a compact disc from its jewel case using a grasping tool, as is shown in the Kaufman patent, so as to "eliminate fingerprints and avoid potential damage" (col. 1, lines 15 and 16).

Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use Anderson's device for grasping and manipulating a compact disc as it is transferred from its jewel case to a CD player or the like, as taught by Kaufman, in order to avoid direct contact between a user's fingers and the data storage surface of the disc.

In regard to claim 16, Anderson shows embodiments in Figures 2, 3, 9, and 10 having one padded surface overhanging the other padded surface.

In order for the resulting manipulating device to remove a compact disc from a standard jewel case, the thickness of at least the grasping portion of the manipulating device would obviously be designed to fit between the bottom surface of a disc and the top surface of a jewel case. For instance, the thickness of the resulting grasping portion would be similar to the dimension of grasping portion (24g) shown in Figure 5 of the Kaufman patent.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
